

DATA WAREHOUSE AND ANALYTICS SOLUTION

Medicare, Medicaid, Commercial, Self-Funded, Dental and Vision Plans, IPA's, & ACO's

Our analytics solutions empowers decision-makers to take action. HxLogic transforms data delivered through pre-built, self-service and predictive analytics capabilities.

HxLogic is a powerful tool that provides healthcare organizations with near real-time information for fundamental subjects like claims, members, providers, product, medical informatics, general ledger and standardized code sets.

Enabling Clients to:

- Reduce costs with insights that improve outcomes and increase operational efficiencies
- Make better decisions with a powerful data warehouse
- Take action and correct problems before they effect quality of care
- Integrate all types of structured and unstructured data, including medical, pharmacy, and dental claims, as well as information about member eligibility, benefit design, providers, enrollment, public databases, demographics, websites and member experience outlets

Accelerate

Expedite the deployment of your data warehouse with prebuilt rules and models

Save

Lower the risk and cost of ownership while reducing the burden on IT resources

Identify

Improve decision making with better visibility into healthcare expense and cost management
